EDUCATION

Pimpri Chinchwad College of Engineering

Masters in Computer Applications - 8.3 SGPA

Pune, MH

2025-2027

Dr. Babasaheb Ambedkar Marathwada University

Bachelors in Computer Applications - 7.3 CGPA

Aurangabad, MH

2022-2025

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Frameworks: React.js, Express.js, Django

Databases: PostgreSQL, Supabase

Tools & Deployment: Github, GitHub Actions, Docker, Render, Vercel

PROJECTS

Real-Time Collaborative Whiteboard System | *React, TypeScript, Django, DRF, Channels, PostgreSQL, Redis*

- Built a real-time collaborative whiteboard with live drawing, chat, and presence using WebSockets
- Designed a scalable backend with Django REST and Channels for low-latency communication
- Implemented secure access control with invite codes, approvals, and role-based permissions
- Developed undo/redo and activity tracking for reliable collaborative editing
- Maintained real-time state consistency using PostgreSQL and Redis

Aeon.find – Automated Essay Recommendation System | *Django, PostgreSQL, Docker, GitHub Actions, Render*

- Built a content-based recommendation system using TF-IDF and cosine similarity for personalized essay suggestions
- Designed a Django-based architecture handling backend logic and template-driven frontend
- Developed an automated pipeline to scrape new articles, retrain the model, and update recommendations weekly
- Implemented scheduled CICD using GitHub Actions for data ingestion, model training, and deployment workflows
- Containerized the application with Docker and deployed on Render with automated redeploy triggers
- Stored and managed essay data in PostgreSQL for efficient querying and updates

UnBoxd | *FastAPI, React.js, Tailwind CSS, SQLite, D3.js*

- Developed a full-stack web app delivering personalized movie insights and recommendations for Letterboxd users
- Built interactive data visualizations using D3.js and charting libraries to analyze user preferences
- Implemented features like personality profiling, review analysis, and taste-based recommendations
- Engineered a FastAPI backend for real-time data scraping and analysis, deployed on Render
- Improved performance with server-side caching and optimized query handling

End-to-End Luxury Watch Price Prediction | *Python, XGBoost, MLflow, DVC, AWS*

- Built regression models to predict luxury watch prices from structured scraped data
- Performed extensive EDA and feature engineering to improve model performance and reduce overfitting
- Optimized hyperparameters and tracked experiments using MLflow to select best-performing model
- Designed a reproducible ML pipeline using DVC for data and model versioning
- Developed ETL pipeline to scrape and store data in AWS S3, ensuring scalable data ingestion
- Deployed containerized Streamlit application on AWS EC2 with automated CI/CD via GitHub Actions

ACTIVITIES

- Insperia Tech team member - worked on the official insperia website.
- Participated in 3 hackathons exploring AI, RL, web development

COURSEWORK

- Data Science Mentorship Program, CampusX
- Deep Learning Specialization, Coursera
